

Entrepreneurship Curricula

Discussion & Debates

Concepts: To learn about economic wellbeing in each country.

Time: 2-3 Hours

Materials: The students will be split into groups from each of their own country, for a Discussion/Debate. Students can use the computers to do some research.

Goals: The main outcomes for this group discussion is it allows students from other countries to learn about different types of businesses in other countries, and it also allows the students to gain ideas/ learn about other students views on their own personal business ideas. In addition it also allows students to learn and discuss about key aspects related to youth entrepreneurial culture in the partner countries.

The discussion will also allow students to understand which types of businesses are more popular, and they are able to understand why this must be.

Description:

Place the Students into groups according to their country.

Discussion 1; 'what types of businesses are more successful in your country and why?'

The second discussion topic is 'If you had a small business what kind would it be? What would your competition be?'
